

The Engineering Institute of Canada

Fellow Citation 2001

Mr. Gordon Jin – *A Member of the CSCE*

Mr. Jin is a graduate of Memorial University with an engineering career covering design, construction and rehabilitation of civil/structural projects. He has provided tireless and dedicated leadership to the development of the Canadian Society of Civil Engineers for Newfoundland, and has developed continuing education, membership and fund raising concepts adopted at the national level of CSCE. The development of CSCE in Newfoundland and Labrador owes much to the dedication, enthusiasm and commitment of Gordon Jin. Similarly he has been active with the Association of Professional Engineers and Geoscientists of Newfoundland as a volunteer on numerous committees, with particular reference to aiding and developing students and young engineers and Engineers-in-Training. This has carried over to participation with Memorial University where Gordon is involved in:

- Strategic planning of construction and structural engineering programs
- The cooperative education program from an employers perspective
- Development of the Mentor Program at Memorial University

Gordon is also deeply involved in community development, especially with the Bowring Park Foundation of St. Johns where he is with:

- The Planning and Priorities Committee
- Board of Directors for the Foundation

Gordon Jin truly represents the ideal of the CP Medal recipient for service and leadership in the branch and regional levels of the EIC and its constituent societies.

Madam President – Mr. Gordon Jin.
