

***Ajay Dalai - nominated by the Canadian Society for Chemical Engineering***

Ajay Dalai is Associate Dean of Research and Partnerships, a Professor in the Department of Chemical Engineering and Canada Research Chair in Bioenergy at the University of Saskatchewan. His research interests include the development of gas to liquid technologies, biodiesel production and applications, hydrogen/syngas production from waste materials, nanotechnology, hydroprocessing of heavy gas oil, value-added products from biomass, solid acid catalysis, clean coal technologies, and activated carbon and CNT production and application.

*Ajay has published extensively in international journals and conference proceedings, and has supervised many MSc and PhD students. He has contributed to many committees and conferences and has been a board member of several international journals. Ajay Dalai has been a life member of the Indian Institute of Engineers, the Indian Catalysis Society, and the American Institute of Chemical Engineers. He is an active member of the CSCHE and has been very involved with public and community events.*

Tonight, we are pleased to recognize Ajay Dalai's achievements throughout a distinguished career in teaching and research.

Ladies & gentlemen and Mr. President, please welcome Ajay Dalai as a Fellow of the Engineering Institute of Canada.
