

André Ivanov - nominated by IEEE Canada

André Ivanov is a Professor and Head of the Department of Electrical & Computer Engineering at the University of British Columbia where he leads one of the largest such departments in the country. André is an expert and innovator in the design and testing of very large-scale integrated (VLSI) circuits. His achievements have led to many new and advanced technologies that have greatly impacted the shape of VLSI test technology processes worldwide and affected the entire semiconductor industry.

André's service to the engineering profession has been outstanding. He has held leadership roles on the organization and technical program committees of several national and international conferences, symposia and workshops, and has remained engaged with industry nationally and internationally throughout his career.

So significant have been André Ivanov's contributions to his profession that he has received major honours such as Fellowships in the Canadian Academy of Engineering, IEEE, and the BC Advanced Systems Institute; as well as awards from the IEEE and UBC. We are proud of André's many achievements including the distinguished honour we now confer.

Ladies & gentlemen and Mr. President, please welcome André Ivanov as a Fellow of the Engineering Institute of Canada.
