

Amin Khouday - nominated by the Canadian Society for Civil Engineering

Amin Khouday is Senior Vice-President and General Manager, Road Transportation (Montreal) Division at SNC-Lavalin. Responsible for innovative work on major infrastructure projects for 38 years, Amin has participated in and managed the inspection, design, supervision, and assessment of several hundred bridges of all types.

Throughout his career, Amin Khouday has served as Project Manager for several high-profile projects that have required knowledge and expertise of design standards and methods relating to multi-disciplinary project execution. Notable examples have included the \$2 Billion Turcot Complex and the redevelopment of the Dorval interchange in Montreal. He has also conducted major feasibility studies on significant bridge projects such as the suspension bridge over the Saguenay River and the replacement of the Jacques Cartier Bridge deck.

Tonight, we are pleased to recognize Amin Khouday's achievements the field of engineering contracting and consulting.

Ladies & gentlemen and Mr. President, please welcome Amin Khouday as a Fellow of the Engineering Institute of Canada.
