

Brent Edwin Sleep - nominated by the Canadian Society for Civil Engineering

Brent Sleep is a Professor and Associate Chair of Research in the Department of Civil Engineering at the University of Toronto. He is internationally recognized for his research on remediation of contaminated soil and groundwater, as well as pathogen transport in the subsurface. A leading authority on the use of thermal methods for soil and groundwater remediation, Brent has provided expert advice to several companies looking to employ thermal remediation methods.

Brent Sleep has made outstanding contributions to the profession through editorships in leading journals in the water resources field and active involvement on important panels and committees. He currently serves as Editor-in-Chief of the Journal of Contaminant Hydrology and as an Associate Editor of Advances in Water Resources.

For his innovative and thoughtful research, his counsel to colleagues and industry, and for his wise and caring supervision of his students, we now pay tribute to Brent with these honours.

Ladies & gentlemen and Mr. President, please welcome Brent Edwin Sleep as a Fellow of the Engineering Institute of Canada.
