

**Andrew Goldenberg - nominated by the Canadian Society for
Mechanical Engineering for the Sir John Kennedy Medal**

Andrew Goldenberg is a Professor Emeritus in the Department of Mechanical and Industrial Engineering at the University of Toronto, cross appointed to Department of Electrical and Computer Engineering, and Institute of Biomaterials and Biomedical Engineering. In addition to being a world class researcher, he is also a highly successful entrepreneur who has successfully integrated the results of his research into the market place to the benefit of all Canadians and all of mankind.

As a researcher, Andrew has published more than 400 technical articles and contributed to 14 books in his field of robotics and automation. In addition, he is the holder of 42 patents which link his analytical achievements with practical applications.

As an entrepreneur, Andrew founded Engineering Services Inc. in 1982, and Anviv Mechatronics Inc. in 2006, companies which employ many professionals and which consolidates Canada's presence in the world stage of robotics technology.

Tonight we take great pride in honouring this distinguished Canadian engineer, researcher and teacher with the Institute's most senior honour.

Ladies and gentlemen, and Madam President, as the Recipient of the Sir John Kennedy Medal, please welcome Andrew Goldenberg.
