

Hussein Mouftah - nominated by IEEE Canada for the K Y Lo Medal

Dr. Hussein Mouftah is recognized for his seminal and outstanding contributions to the engineering science and practice of computer engineering and telecommunication networks. He is the visionary leader and Principal Investigator of a multi-million dollar, multi-year engineering project in wireless sensor networks. This project, known as WiSense, is an example of the vision, calibre, and effectiveness that Mouftah applies to his extremely productive life.

His outstanding contributions to the profession include more than 35 years of service to IEEE Communications Society (ComSoc) including Editor-in-Chief of IEEE Communications Magazine, Director of Magazines, Director of Education, Chair of the Awards Committee and Member of the Board of Governors. He has received several service awards from ComSoc technical committees. He is the recipient of several prestigious awards, such as the IEEE Canada McNaughton Gold Medal and the Read Outstanding Service Award.

In recognition for his outstanding contribution to electrical engineering at the international level, we are pleased to confer this most deserved accolade.

Ladies and gentlemen, and Madam President, as the Recipient of the K Y Lo Medal, please welcome Hussein Mouftah.
