

**Tarek Sayed - nominated by the Canadian Society for Civil Engineering**

A professor at the University of British Columbia and Senior Editor of the Canadian Journal of Civil Engineering, Tarek Sayed is world-renowned for his work on road safety analysis and evaluation. His research to improve the methods of traffic safety analysis and evaluation is helping to reshape how road safety problems are identified and evaluated. The methods and techniques that he developed have received wide recognition and his expertise is sought out by industry and government organizations globally.

His work on proactive road safety management is being applied in several countries and is considered by many as the future of road safety analysis. He also has a number of prestigious awards including the appointment as a UBC Distinguished Scholar, the Institute of Transportation Engineers Wilbur Smith Distinguished Transportation Educator Award, the Award of Academic Merit from the Transportation Association of Canada, the Canadian Society for Civil Engineering Sandford Fleming Award.

This evening we are pleased to honour this dedicated engineer.

Ladies and Gentleman and Madam President, please welcome Tarek Sayed as a Fellow of the Engineering Institute of Canada.
