

EIC Fellow

Reg Andres

Nominated by the Canadian Society for Civil Engineering

Reg Andres is a registered professional engineer in Ontario, Alberta and the Northwest Territories. Reg Andres is a Principal and Vice-President of R.V. Anderson Associates Limited, overseeing the firm's civil and municipal engineering business. With over 40 years of experience as a municipal and consulting engineer, Reg specializes in asset management for municipal infrastructure systems planning, development and implementation of sustainability and life cycle assessment projects and programs. Mr. Andres has been involved in all aspects of multidisciplinary municipal projects including planning, design, preliminary engineering, detailed design and construction. This includes several years with the government of the Northwest Territories where he was responsible for managing the water and wastewater programs for the Inuit communities in Canada's Arctic.

Reg's experience in municipal infrastructure includes presenting to the Walkerton Inquiry on sustainable cost of services. In addition to his work at RV Anderson, Reg has demonstrated leadership in the profession of civil engineering in Canada in the following roles:

- Chair of the Expert Panel for the Civil Infrastructure Systems Technology Road Map initiative for the Canadian Society for Civil Engineering.
- Chair of the National Asset Management Working Group developing a national framework for asset management.
- President of the CSCE.

Ladies & gentlemen and Mr. President, please welcome Reg Andres as a Fellow of the Engineering Institute of Canada.
