

The Engineering Institute of Canada

EIC Fellow – 2017

Jocelyn Grozic

Nominated by the Canadian Geotechnical Society

Professor Jocelyn Grozic is Professor of Civil Engineering and Associate Dean of Research at University of Calgary. She does research on gas hydrates and established a new laboratory for research on gassy soils at the University of Calgary, and she leads one of the premier research centres on gas hydrates in Canada. She has educated or is presently supervising a total of 25 graduate students. She has received several awards for her teaching and for the quality of her publications.

Jocelyn has an impressive publication record, with an average of five papers per year. She has received no less than 28 honors and awards so far. She shows a keen enthusiasm in all her endeavours and is fully committed to the engineering profession and the education of new civil engineers. She has showed leadership in research, teaching and university administration, as well as services to the profession and community.

Jocelyn Grozic has had an exceptional career, with an impeccable teaching, research and publication record, becoming a role model for both genders in academia in Canada. Her achievements and professional activities truly reflect excellence in engineering and services to the profession and society.

Ladies & gentlemen and Mr. President, please welcome Jocelyn Grozic as a Fellow of the Engineering Institute of Canada.
