

The Engineering Institute of Canada

EIC Fellow – 2017

Rick Tiller

Nominated by the Canadian Society for Civil Engineering

Richard Tiller is president and CEO of Tiller Engineering Inc., a premier structural engineering firm specializing in the structural design and analysis of buildings, heavy industrial facilities, and communication towers. Since graduation, he has undertaken structural engineering work throughout the country and overseas. He has led the design on some of the provinces' most challenging and innovating projects, including many buildings and telecommunication structures plus the Floating Production Storage and Offloading structures now operating offshore of Newfoundland.

Richard has also given freely of his time over the years to numerous societies and community organizations, and has shown incredible leadership in each. His contributions to the CSCE and the profession have been recognized at the section, regional and national levels of the Society.

He is a Fellow of the CSCE and Engineers Canada. In 2016, he was recognized by Atlantic Business Magazine as one of the top 50 CEOs in Atlantic Canada. Richard's dedication and relentless pursuit of engineering excellence have been the foundation of his current engineering practice, and his work in the telecommunications engineering sector has been the standard for industry to follow.

Ladies & gentlemen and Mr. President, please welcome Richard Tiller as a Fellow of the Engineering Institute of Canada.
