

Fellow of the Engineering Institute of Canada

John Anthony (Tony) Howard - nominated by the Canadian Society for Engineering Management

Tony Howard is a Management Consultant in Calgary and during his career he worked in several technical and business roles within the consulting engineering and utility industries, and undertook several international assignments.

With Montreal Engineering, Tony was a Project Manager on thermal power facilities across the country and on several aviation and agricultural projects in Jamaica, Colombia and Afghanistan. At TransAlta Utilities in Calgary, he served as Director of Generation Design and Construction, as Director of Marketing, and then as Vice President, Energy Supply Systems for TransAlta Energy Systems, a wholly-owned subsidiary. He returned to the consulting arena with Agra Monenco (now AMEC), then Stantec Consulting, and entered private practice in 2000 with the formation of John A. (Tony) Howard Consulting Ltd.

In addition to these many duties, Tony Howard always found and continues to find time to serve the profession and the community: as Councillor and President of APEGGA; as Past President of the Rotary Club of Calgary; as a volunteer with the United Way of Calgary; as Chief Warden of Camp 18 of The Corporation of The Seven Wardens; and as the President of the Calgary Section of the CSEM, to name a few. He never misses a chance to give back to his profession and to society, including the mentoring of new graduates, and for this dedication to others we salute a distinguished Fellow of the EIC.

Ladies & gentlemen and Madam President, please welcome Tony Howard as a Fellow of the Engineering Institute of Canada.
