

Kenneth Morrison - nominated by the Canadian Society for Civil Engineering

Since 1972, Ken Morrison has worked with the consulting engineering firm of R.V. Anderson Associates, rising through the ranks from design engineer, project engineer, associate director, principal director, vice-president & treasurer to President, a role he has assumed since 1989. During Ken's 35 years as a professional engineer, he has earned the highest respect from his peers for his work in environmental engineering projects related to water and wastewater treatment, transportation, urban development and telecommunications. R.V. Anderson Associates provides consulting engineering services to the public and private sectors in many parts of Canada and internationally.

Ken's work has included planning, environmental assessments, design, construction support services, operations and facility optimization. Some typical projects on which Ken has worked include the Keele Trunk Relief Sewer Tunnel, the John Street Water Pumping Station, the Robert O. Pickard Environmental Centre, the Environmental Review of the Sydney Tar Ponds Sediment Remediation System, and the New Brunswick Telecommunications Transmission System, to name but a few.

Ken has also given freely of his time over the years to numerous societies and organizations and has shown incredible leadership in each. For the North York General Hospital in Toronto, Ken has served as Governor and Chairman, and for this hospital's Foundation, he has served as Treasurer and Chairman of Finance. He is currently Chairman of the Board of Directors of the Ontario Central Local Health Integrated Network. His contributions to the CSCE and the EIC have been demonstrated through his activities with the EIC Edmonton Branch, the Toronto Section of the CSCE, the CSCE Ontario Region and his five years as Chair of the Professional Activities Committee with CSCE National.

Ken Morrison is highly respected and a credit to the civil engineering profession. He has been honoured in the past with a CSCE Fellowship, the CSCE's James A. Vance Award, and the EIC's Canadian Pacific Railway Engineering Medal. Tonight, we are pleased to have the opportunity to add to those honours through an EIC Fellowship.

Ladies & gentlemen and Mr. President, please welcome Ken Morrison as a Fellow of the Engineering Institute of Canada.
