

Anader Benyamin-Seeyar

IEEE Canada

Anader Benyamin-Seeyar is a leading specialist in source coding, channel coding, modulations, users multiple access techniques, and multi-media networking solutions. He has contributed significantly as an engineer, manager, and director to multiple high technology companies in the field of telecommunications, computer communications, and aerospace technologies since 1985.

Anader Benyamin-Seeyar is Adjunct Associate Professor at Concordia University, where he has taught and conducted research since 1987. Moreover, he has provided exceptional service to the telecommunications engineering research community.

He served as Chair of the IEEE Montreal Section for two years, as Secretary for one year, and he is presently chairing the Communications and Information Theory Chapter of the Montreal Section. In recognition of his engineering and volunteer efforts, he was the recipient of the 2008 IEEE MGA Leadership Award.

This evening we are pleased to honour this talented and dedicated engineer for his exceptional service to the telecommunications engineering research community.

Ladies & gentlemen and Mr. President, please welcome Anader Benyamin-Seeyar as a Fellow of the Engineering Institute of Canada.
