

**Vic Perry - nominated by the Canadian Society for Civil Engineering**

Vic Perry is Vice-President and General Manager of Ductal® Lafarge North America in Calgary. Over a 30-year career, Vic has worked as a structural engineer, field engineer, manager and senior executive within the consulting and industrial sectors. He has admirably served organizations such as the Canadian Portland Cement Association, Dalhousie University and Lafarge Canada, as well as Canada's technical societies and regulatory bodies such as the CSCE where he has served as its national President, the EIC, PEO, APENS and APEGA.

In addition, Vic has offered his organizational talents to community groups wherever he and his family have lived. He has been the recipient of many awards from APEGA, the University of Calgary, and the Portland Cement Association, and is a Fellow of the CSCE and Engineers Canada.

Tonight, we honour a leader from industry by elevating him to the grade of Fellow of the Engineering Institute of Canada.

Ladies and Gentleman and Madam President, please welcome Vic Perry as a Fellow of the Engineering Institute of Canada
