

**Greg F. Naterer - nominated by the Canadian Society for Mechanical Engineering
Canada for the Julian C. Smith Medal**

Dr. Greg Naterer is an innovative leader in engineering education and research who has made significant contributions and achievements in the development of Canada. Both as an academic leader and researcher, his contributions have made a significant impact, nationally and internationally, particularly in the mechanical engineering fields of heat transfer, hydrogen energy and multiphase flows.

Among his awards and honours for research and teaching, he received the CSME Jules Stachiewicz Medal and the Canadian Nuclear Society Innovative Achievement Award.

Dr. Naterer has served in prominent national and international leadership roles in engineering research and education. He is the Dean of Engineering at Memorial University and currently vice-chair of the National Council of Deans of Engineering and Applied Science (NCDEAS). Dr. Naterer is a Fellow of the Canadian Society for Mechanical Engineering, American Society of Mechanical Engineers and EIC.

Tonight we are pleased to recognize a talented engineer for recognition of many years of leadership and service within the Institute.

Ladies and Gentleman, and Mr. President, as the recipient of the Julian C. Smith Medal, please welcome Greg Naterer.
