

Weiming Shen - nominated by IEEE Canada

Dr. Weiming Shen has distinguished himself internationally as a foremost expert on agent-based collaboration technologies and their application, particularly in the areas of engineering design and intelligent manufacturing. He has successfully applied his expertise in developing decision support and optimization solutions, thus making significant contributions to Canadian industry.

Dr. Shen's contributions to the engineering profession and society, both as a researcher in the areas of collaboration technologies and applications and as a volunteer within IEEE, are outstanding.

He has been volunteering within the SMC (Systems, Man, & Cybernetics) Society internationally and in the local IEEE community. He co-founded/chaired the IEEE SMC Technical Committee on Computer Supported Cooperative Work in Design. He is an Associate Editor or Editorial Board Member of ten international journals and has served as guest editor for several international journals.

For his remarkable contribution to engineering design and intelligent manufacturing, we now pay tribute to Weiming Shen with these honours.

Ladies and Gentleman and Madam President, please welcome Weiming Shen as a Fellow of the Engineering Institute of Canada.
