

Honorary Member, EIC

Phillip Bates

Nominated by the Canadian Society for Chemical Engineering

Phillip Bates' career spans the private and public sector. Among other facets, it includes employment Solvay Advanced Polymers, Oudenaarde (Belgium), Vetrotex International, Chambéry (France) and Procter & Gamble Inc (Hamilton, Ontario).

He is currently a professor at the Royal Military College of Canada.

Phil is an innovative leader in engineering education and research who has made significant contributions and achievements in the development of Canada. Both as an academic leader and researcher, his contributions have made a significant impact, nationally and internationally. For his landmark contributions to polymer welding and joining, he is being recognized by his peers tonight.

Ladies and Gentleman, and Mr. President, please welcome Philip Bates as Honorary Member of the EIC.
