

EIC Fellow

Ibrahim Gedeon

Nominated by IEEE Canada

Under Ibrahim's inspired technology leadership, TELUS is one of the fastest growing IPTV providers in the world and Canada's largest healthcare IT provider. TELUS continues to be at the forefront transforming from Telco to Softco, shifting from a transactional to solutions-orientated culture to satisfy the insatiable customer demand for bandwidth, service reliability and security. TELUS in a box and building enablers were announced in June, 2015, establishing Edmonton as a Gigabit/5G city.

Ibrahim is leading the TELUS team to embrace multiple strategies to meet the data flood, such as decomposing and recomposing architectures using Agile, Cloud, Softwarization and Virtualization principles; and are at the forefront of software defined networks and network function virtualization adoption through support of research, proof of concepts, and early product trials in cloud orchestration, virtual customer premise equipment, Networks as a Service, and virtual Evolved Packet Core.

Ladies & gentlemen and Mr. President, please welcome Ibrahim Gedeon as a Fellow of the Engineering Institute of Canada.
