

The Engineering Institute of Canada 2018 Award Citation – EIC Fellow

Kimberley John Greenwood

Nominated by the Canadian Medical and Biological Engineering Society

Kim Greenwood has been a consistent contributor to the profession of Clinical Engineering for nearly forty years. As Director of the Clinical Engineering Department at the Children's Hospital of Eastern Ontario (CHEO) in Ottawa, Kim has successfully developed the CHEO clinical engineering service from a small group to become a comprehensive regional program providing external services to 18 hospitals at 23 sites. He successfully implemented an effective clinical technology planning and management methodology over the last two decades that has been validated with measured statistical results.

Under Kim's leadership, CHEO Clinical Engineering Department has been recognized internationally as a leader in healthcare technology management. It has also developed an informal outreach program that has provided functional medical equipment to eight countries around the world. Kim has encouraged his team's involvement with the local Biomedical Engineering programs over the years with teaching assistance, and he participated in numerous publications.

Kim serves on the Board of Directors of the Ottawa Health Sciences Centre and the Canadian Board of Examiners for Biomedical Engineering Technologist and Technicians. He has acted as a resource to both the federal and provincial governments and participated in medical device related provincial committees.

Ladies & gentlemen, and Mr. President, please welcome Kimberley John Greenwood as a Fellow of the Engineering Institute of Canada.
