

Fellow EIC

Digvir Jayas (Member of the Canadian Biological Society) - nominated by IEEE Canada

Digvir Jayas est vice-président – Recherche, à l'Université du Manitoba, et il est membre du conseil de rédaction de cinq publications internationales. Il a signé ou cosigné plus de 650 articles techniques, communications, chapitres et livres, en plus d'être détenteur d'un brevet provisoire américain.

Digvir is a world renowned leader in grain storage research. He has developed several applied solutions to the problems encountered during grain storage. Results from several of his studies have been incorporated into standards related to grain drying and storage, and these standards are used by engineers around the world. Digvir has provided technical guidance and leadership in the biosystems engineering, agricultural, and food-science communities, and has provided tremendous input to the advancement of the engineering profession itself. So significant have been his contributions to his profession that he has received major honours and awards from Engineers Canada, the Canadian Society for Bioengineering, the Canadian Institute of Food Science & Technology, the American Agricultural & Biological Engineers, and the Association of Professional Engineers and Geoscientists of Manitoba.

Ladies & gentlemen and Mr. President, please welcome Digvir Jayas as a Fellow of the Engineering Institute of Canada.
