

**EIC Fellow**

**Branislav Djokic**

**Nominated by the IEEE Canada**

Branislav Djokic is an internationally recognized researcher. Throughout his engineering career, he has worked for and developed collaborative ties with universities, government labs, and private industry. He made outstanding contributions to electrical metrology at low frequencies, notably in high-precision electrical power measurements and AC current measurements using current-sensing coils. His extraordinary contributions to R&D in electrical power measurements range from industry-licensed electronic electricity meters to the highest accuracy AC power standards.

Branislav was awarded the IEEE Fellowship for contributions to precision electrical metrology in electrical power applications. He has maintained a strong professionalism and leadership in his long term volunteer activities.

Tonight, we are only too pleased to celebrate his career as we confer this honor.

Ladies & gentlemen and Mr. President, please welcome Branislav Djokic as a Fellow of the Engineering Institute of Canada.
