

EIC Fellow

Amir Khajepour

Nominated by the Canadian Society for Mechanical Engineering

Amir Khajepour is a leading expert in the modeling in control of dynamic systems. He has developed an extensive research program that applies his expertise in several key multidisciplinary areas. This research has produced 16 patents and two startup companies. He is the recipient of the Engineering medal from Professional Engineers Ontario, and is a Fellow of the American Society of Mechanical Engineering and of the CSME.

His research has been marked by repeated successful technology transfer. Most of the processes and technologies he has developed have been successfully deployed and then in industrial applications his inventions and development of a new class of cable robots has been patented.

Ladies & gentlemen and Mr. President, please welcome Amir Khajepour as a Fellow of the Engineering Institute of Canada.
