

**EIC Fellow**

**Keith Brown**

**Nominated by IEEE Canada**

After spending 15 years of exemplary decorated services to Canada with the Royal Canadian Navy, Keith Brown is currently in a leadership position with Ontario Power Generation Nuclear division. Over the past 12 years, he has

- performed award-winning research and development in the field of wireless sensor technology;
- led improvements and techniques for nuclear reactor flux detector noise measurements and analysis; and
- led national groups of nuclear experts performing technical investigations.

In addition to making many contributions to advancement of engineering, Keith has selflessly given his time as a volunteer to IEEE at the section, area and regional levels and to the governance of IEEE.

Keith Brown is an exceptional engineer, a leader who has the unique ability to inspire others to aim for excellence. He is self-motivated, resourceful, highly committed and takes pride in his involvement in the engineering profession.

Ladies & gentlemen and Mr. President, please welcome Keith Brown as a Fellow of the Engineering Institute of Canada.
