

# The Engineering Institute of Canada

## 2020 Award Citation

### EIC Fellow

**Leonard Murray**

**Nominated by the Canadian Dam Association**

*Len Murray is CEO/President of Klohn Crippen Berger Ltd., an international engineering and geoscience firm headquartered in Vancouver, British Columbia. Len has over 40 years of civil/geotechnical and environmental engineering experience throughout the world.*

*Len brings a global business perspective to the role of President, complementing his extensive experience in design and construction of mining developments, earth dams, tunnels, hydro-electric, and transportation projects.*

*As a trusted advisor to worldwide major mining clients, Len participates in advisory panels, peer reviews, audits and due diligence assessments for many tailings disposal systems and water dams. He has designed and reviewed more than 100 tailings dams and water dams around the world, and has also been involved in water and sediment management, construction supervision, and project management of mining projects.*

*In his long career, Len has demonstrated excellence in engineering through participation in many successful and award-winning projects, developed trusted relationships with clients, and made significant contributions to the profession and society through presentations and papers at conferences, as well as the mentoring of many young professionals.*

*Ladies and gentlemen, and Mr. President, please welcome Leonard Murray as a Fellow of the Engineering Institute of Canada.*
