

The Engineering Institute of Canada

2024 Award Citation

EIC Fellow

John Bianchini

Nominated by Tunneling Association of Canada

John Bianchini is Chairman and CEO of Hatch, an international engineering services consultancy headquartered in Mississauga, Ontario. He has enjoyed a 38-year engineering career, having joined Hatch directly after graduating from the Chemical Engineering program at the University of Toronto. He is a natural leader and team builder who has led growth throughout the organization.

He has led and managed projects spanning the globe and continues to play a leading role in the globalization of Hatch's engineering business, especially in South Africa, Australia, Peru, Brazil, and China. John actively supports the profession through membership in engineering organizations such as the Canadian Academy of Engineering, Canadian Institute of Mining, Metallurgy and Petroleum, Canadian Society for Chemical Engineering, and Professional Engineers Ontario. At Hatch, he is chairing several committees aimed at promoting diversity and inclusion, creating more opportunities for young engineers, and developing a more positive relationship with Indigenous communities.

John has a keen interest in the engineering programs at local universities, where he has led seminars in engineering and project management. He is a member of the Advisory Board of Chemical Engineering at the University of Toronto, where he is actively involved in their curricula development and research activities.

Ladies and gentlemen, and Ms. President, please welcome John Bianchini as a Fellow of the Engineering Institute of Canada.
